- ▶ Trump, un game changer?

AN AMERICA FIRST ENERGY PLAN

- ▶ Make America **energy independent**, create millions of new jobs, and protect clean air and clean water. We will conserve our natural habitats, reserves and resources. We will unleash an energy revolution that will bring vast new wealth to our country.
- ▶ Declare American **energy dominance** a strategic economic and foreign policy goal of the United States.
- ▶ **Unleash America's \$50 trillion in untapped shale, oil, and natural gas reserves, plus hundreds of years in clean coal reserves.**
- ▶ **Become, and stay, totally independent of any need to import energy from the OPEC cartel or any nations hostile to our interests.**

AN AMERICA FIRST ENERGY PLAN

- ▶ **Open onshore and offshore leasing** on federal lands, eliminate moratorium on coal leasing, and open shale energy deposits.
- ▶ Encourage the use of natural gas and other American energy resources that will both reduce emissions but also reduce the price of energy and increase our economic output.
- ▶ Rescind all job-destroying Obama executive actions. **Mr. Trump will reduce and eliminate all barriers to responsible energy production**, creating at least a half million jobs a year, \$30 billion in higher wages, and cheaper energy.

What will happen:

- ▶ Opt out of Paris climate agreement
- ▶ Stop subsidies to renewables (except ethanol)
- ▶ Support coal, gas, nuclear
- ▶ Invest in infrastructure (mostly transport)
- ▶ Question free trade

MERCI

Other quotes

- ▶ Support coal jobs, safe fracking, energy from offshore and public lands and the Keystone Pipeline, which can be done responsibly.
- ▶ Trump said he supports renewable energy “but not to the exclusion of other forms of energy that right now are working much better.”
- ▶ “I'm in favor of nuclear energy, very strongly in favor of nuclear energy”
- ▶ Trump suggested clean energy policies to reduce CO2 emissions would “imperil jobs” and “the middle class and lower classes.”
- ▶ Sources of “green energy” are “really just an expensive way of making the tree-huggers feel good about themselves.”
